

Bonastre System Pads

The Floor Polishing Revolution

Diamond Impregnated Polishing Pads

For the most demanding results

Improve the quality of your work with a simpler and easier process to renew, polish and maintain your floors. Save time and money with Bonastre's Diamond Impregnated Pads that will help you get the results you want in the most efficient way possible. With only 3-steps you'll get a super high gloss-finish. Fewer steps than other polishing procedures. NO polishing experience needed!

The Bonastre System developed in Europe is the solution for all your stone and concrete floor needs, from restoration to maintenance... and everything in between.

Features

- » Simple process, fewer steps, better results
- » Eco-Friendly, no chemicals needed.
- » NO polishing experience needed! Easy steps to follow
- » No dust or odors
- » Use any floor polisher or floor scrubber (up to 400 RPM)

Specifications

» Step 1 - RED / Matte Finish

Removes micro scratches and light wear: apply water onto the work area and make passes over the surface, 1 minute per 10 sq. ft. (4 to 6 passes*). Rinse and vacuum up the solution.

» Step 2 - YELLOW / Semi-Gloss Finish

Apply water onto the work area and make 4 to 6 passes* over the surface, rinse and vacuum up the solution.

» Step 3 - GREEN / High Gloss Finish

Last step to achieve an exceptional, natural looking, "like a mirror finish" anti-slip

Use the super polishing pad to finish: apply water onto the work area and make 4 to 6 passes* over the surface, rinse and vacuum up the solution.

On soft stones, it is highly recommended to repeat this step for best results.

For use with Floor Machines. For use with Floor Scrubbers make 15 passes over the surface. The number of passes may vary depending on the equipment and the surface type.
