

STONE CARE

STONE SHINE

SPRAY POLISH

WORKS GREAT ON

POLISHED STONE
& STAINLESS STEEL

REDUCES FINGER MARKS
Shines & Protects

MB-13

**POLISH A
DEEP GLOSS**

MB-13 Stone Shine penetrates, enhances, protects, smooths and beautifies all polished stone surfaces. It adds shine and creates a protective shield that repels water, reduces finger marks, and makes routine cleaning easier! It also visually restores slightly worn-down surfaces to like-new condition! It's a terrific product for polished stone countertops, shower enclosures and stainless steel surfaces.

DO NOT USE ON FLOORS. SHAKE WELL BEFORE USE.

APPLICATION:

Clean the stone surface thoroughly, using our Stone & More or, for heavy-duty situations, our Soap & Mineral Remover prior to Stone & More. Allow surface to dry to a streak-free look. Apply Stone Shine sparingly but thoroughly using a spray or a fingertip trigger. Buff to a uniform finish using a clean white piece of terry cloth. If you notice some smearing occurring, stop buffing, wait for another minute or so, then buff again with a clean white piece of terry cloth. If streaking persists, spray a little bit more product and buff immediately to blend. When first used, a repeat application may be called for. Stone Shine may need to be reapplied in a few days or a few weeks according to the intensity of use of the surface on which the product is applied.

CONTAINS FOODGRADE EMULSIFIERS.

SPECIFICATIONS:

Appearance.....	Milky Viscous Liquid
Odor.....	Mint Lemon Odor
Specific Gravity.....	0.995
pH.....	8.0
Boiling Point.....	Near 212°F
Flash Point.....	107°F
Water Solubility in Water.....	Complete
