

STONE PROFESSIONAL

# ALKALINE HD HEAVY DUTY CLEANER

## DESIGNED FOR

STONE, TILE  
AND GROUT

**HIGHLY  
CONCENTRATED**  
Powerful and Effective  
Cleaning

**MB-2 Alkaline HD is a highly concentrated product designed to clean the toughest soils from stone, tile, grout, any other hard surface not harmed by water.**

**This biodegradable, powerful cleaning agent, formulated with the latest cutting edge technology, will clean deep into your grout and any other treated surface effectively and easily.**

### APPLICATION:

**Mix MB-2 in the following proportions with hot water:**

**Light soiling:** 3fl oz to 1 gallon (25mL to 1 liter) of water

**Medium soiling:** 6fl oz to 1 gallon (50ml to 1 liter) of water

**Heavy soiling:** 8fl oz to 1 gallon (65mL to 1 liter) of water

For routine cleaning use MB-1 Floor-Amore for floors and MB-5 Stone & More for other surfaces. ALWAYS TEST PRODUCT IN AN INCONSPICUOUS AREA. Remove all loose debris from surface to be cleaned. Strip floor from wax or any topical sealers. Apply the solution liberally with a mop or a sprayer and allow product to dwell. For small areas use a cotton rag or sponge. Level of soiling will determine dwell time. Light soiling may require a very limited dwelling time, a few minutes. The longer the product is allowed to dwell, the easier the cleaning procedure will be. DO NOT let the product dry on the surface being cleaned. Agitate solution with hand-brush or floor machine. Remove solution with mop or, for best results, with a wet & dry vacuum cleaner. For small areas use a dry

cotton rag or sponge. MB-2 is NOT a rinse-free product. Rinse thoroughly with plenty of clear water. Once the floor is dry, buff to a uniform clean using a white nylon pad. To help prevent deep soiling and staining in the future, apply MB-24 Barrier impregnating sealer.

### SPECIFICATIONS:

Appearance.....	Clear Liquid
Odor.....	Characteristic Odor
Specific Gravity.....	1.030
pH.....	12.5
Boiling Point.....	Near 212°F
Flash Point.....	207°F
Water Solubility in Water.....	Complete
