

Penetrex Long Lasting Antimicrobial Protection

MediDefense Penetrex

Active Barrier
bonds to treated surfaces for long term
protection between cleanings.

Highly effective in reducing ATP scores and an effective bacteriostatic coating

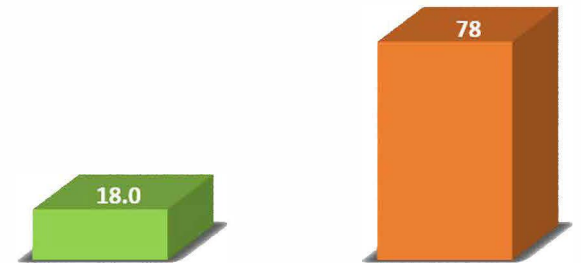

Calvert Memorial Penetrex Efficacy Study

Penetrex™

In a recent hospital study **Penetrex** outperformed standard hospital protocols by more than **4** to 1 in head to head ATP counts

EPA REGISTERED
FDA APPROVED FOR FOOD CONTACT SURFACES

- Effective against a wide range of micro-organisms
- Reduces the risk of contaminated sulfates which can be vectors for disease transmission
- Cost effective long term protection
- Easy to apply
- Lasts weeks or months
- Safe for virtually all surfaces
- Reduces risk of cross-contamination
- Verifiable better results than standard cleaning protocols

Treated surface with Penetrex 8
Week Average ATP Score

Untreated using hospital
standard protocols 8 Week
Total Average ATP Score
